### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Philip Dubois on 04/01/04.

The application has been amended as follows:

Claim 1, lines 9-11, the phrase "and wherein the active ingredient is dispersed in said lipophilic matrix" has been deleted.

Claim 1, line 21, after the phrase "optionally other excipients;", the word "and" has been deleted.

Claim 1, last line, after the phrase "80 to 95% by weight of the total composition", the phrase ", and wherein the active ingredient is dispersed both in the lipophilic matrix and in the hydrophilic matrix" has been inserted.

Claims 4 and 6-8 have been cancelled.

Claim 9, lines 3-4, the phrase ", wherein the active ingredient is dispersed both in the hydrophilic matrix and the lipophilic matrix" has been deleted.

Art Unit: 1615

The following is an examiner's statement of reasons for allowance:

The reason for allowance of the claims is the inclusion of active ingredient is dispersed in both, the lipophilic and the hydrophilic matrices. The cited reference teaches the active ingredient being within the core, not dispersed in the matrices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1, 3, 9 and 11 are allowed.

#### ***Pertinent Arts***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Samour et al. and Wheatley et al. are cited as being of interest for the teachings of bi-layer liposome. However, the cited references do not teach the active ingredient being dispersed in both layers.
